

Online Public Inspection File Certification

Bethany Church uploaded into the online public inspection file of WLFT-DT all of the requested records of requests for political broadcast time, quarterly issues/program lists and children's television programming reports throughout the station's current license term. As the result of staffing issues, not all of those records were uploaded timely into its online public inspection file.

The licensee has adopted written procedures to ensure future compliance with the upload requirements for these records. The licensee has complied in all other respects with the Commission's online public inspection file requirements.
