Re: Assignee Certifications for LPTV Stations Construction Permit Extension Requests

Dear Ms. Dortch:

Gray Television Licensee, LLC (“Gray”) has filed applications with the Commission (the “Assignment Applications”) seeking consent to the assignment of the construction permits for each of the low power television stations set forth in Attachment A (the “LP Permits”). The current permittee of the LP Permits has requested an extension of time until January 10, 2022, to complete construction of the LP Permits (the “Extension Requests”).

Subject to the Commission granting the Extension Requests, Gray intends to complete construction of each of the LP Permits as soon as reasonably possible and in all events before January 10, 2022. In the coming days, in coordination with the current permittees, Gray will submit applications to modify the LP Permits to relocate the LP Permits to certain towers owned or to be acquired by Gray and (if necessary) to specify a new in-core television channel. Gray already is in the process of ordering the necessary equipment, including transmitters, transmission lines, and antennas, for each of the LP Permits.

Since June, Gray has constructed permanent facilities for six new low power television stations, and by the end of July, Gray anticipates that it will have completed construction of several more low power television stations. Therefore, if the Commission grants the Extension Requests and Assignment Applications, Gray is confident that it will complete construction of each of the LP Permits well in advance of the January 10, 2022, construction deadline and Gray fully intends to do so.

If you have any questions about this matter, please contact me.

Sincerely,

Robert J. Folliard, III
Assistant Secretary
