

Shared time auxiliary facility for stations WOVE and WKWK-FM

This application is to established a shared time auxiliary facility for stations WOVE and WKWK-FM. The stations will NOT operate into the antenna at the same time. The proposed location is 61 meters above ground upon an existing tower identified by registration number 1035146. An antenna with vertical polarity of radiation only, is proposed; no energy is to be emitted in the horizontal plane. Below is a map demonstrating compliance with Section 73.1675.

Due to the complexity of the surrounding RF environment, applicant will take power density measurements prior to filing of an application for license, demonstrating compliance with 73 CFR 1.1306.
