

Justification for Engineering STA

Bet-Nahrain, Inc. (“Bet-Nahrain”) requests Special Temporary Authority (“STA”) to operate KBSV with temporary facilities as set forth in this STA request. Bet-Nahrain is exploring a solution for new permanent facilities after it was forced to relocate its transmitter and antenna from the station’s licensed site at Mount Oso when its landlord broke the lease. KBSV provides the Assyrian people living in Stanislaus County with an important connection to their culture. Bet-Nahrain is exploring options for a long-term solution to the problem created by loss of access to the station’s licensed transmitter site. As soon as Bet-Nahrain arrives at a solution, it will amend its pending application for construction permit for modification of the station’s facilities and construct the modified facilities upon grant of that application.
