

Online Public File Exhibit

In the course of preparing the instant renewal application, licensee reviewed its online public file and noticed some discrepancies. Five local political orders were uploaded to the public file after more than one business day, though all were uploaded within three business days. Due to delayed availability of information from a network about schedules not placed directly with the station, political orders for three network schedules were not timely uploaded to the public file. Going forward, licensee will ensure all documents for local orders are timely uploaded to the public file.
