

## **Online Public File Exhibit**

In the course of preparing the instant renewal application, licensee reviewed its online public file and noticed some discrepancies. One annual EEO public file report was uploaded late and some issues/programs lists were uploaded late as the station adapted to using the online public file interface. Additionally, ten federal candidate political orders were uploaded after more than one business day, four of which were uploaded within three business days. Going forward, licensee will ensure all documents are timely uploaded to the public file.
