Re: K38NR-D  
BLDTL20140729AAT  
Alexandria, LA  
Facility ID Number: 189745

Dear Mr. Colombo:

On behalf of Developers and Managers Group, LLC (“Developers”) requesting the Commission grant Low Power Digital Television Station K38NR-D Silent Special Temporary Authority (STA).

This request should have been submitted August 29, 2018 to comply with and because of the very extraordinary circumstance T-Mobile’s 600 MHz. spectrum operations commencement within Partial Economic Area (PEA) #189 September 7, 2018. K38NR-D did vacate the channel 38 spectrum September 7, 2018.

Developers requests Commission relief from Section 312(g) of the Communications Act.

Developers has made corrections and updates as requested by Andrew Kennedy, FCC Attorney Advisor, to the K38NR-D filing for re-licensing renewal and the Commission grant the Silent STA.

Developers is a minority broadcaster providing unique access to over the air broadcast television in Alexandria, LA.

Currently the active K38NR-D Construction Permit is facing an unknown completion date because the transmitter delivery is delayed. Components to fabricate the transmitter are stuck in Los Angeles, CA. Have applied for tolling the present CP date until February 23, 2022.

Sincerely,

*Ernest L. Johnson,*
