

KSDS Online Public File

All of the documents required to be in the KSDS public file are now included in the station's online public file. A number of those documents were posted to that file after their due dates, however.

All of the KSDS EEO public file reports were prepared each year. The 2017 public file report was posted on time, as was the 2021 report, and the report for 2018 was posted on August 3, 2018, only two days late. Initially, KSDS did not realize that the public file reports for years prior to 2017 needed to be added to the online public file, nor did it realize that it had inadvertently omitted the 2019 EEO public file report from the online file, but those documents were added on June 25, 2021.

The station's quarterly issues/programs lists also were prepared on a quarterly basis throughout the license term, but most were uploaded to the online public file a bit after the deadline for such uploads. KSDS did not realize that reports for the entire license term needed to be included, and that the license term had begun on December 1, 2013; therefore, the reports for the fourth quarter of 2013 and all of 2014 were uploaded on July 24, 2021. The reports for the quarters from the first quarter of 2015 through the second quarter of 2018 were posted on December 7, 2018, and the report for the third quarter of 2018 was uploaded on December 8, 2018. The reports for the remainder of the license term, with the exception of the on-time posting of the issues/programs list for the fourth quarter of 2019, were posted on dates that were between less than a month and approximately two months late. These tardy postings were due to lack of understanding of the exact due dates or understanding of the need to post the reports within ten days of the end of the quarter. KSDS management is now aware of the deadlines and the importance of meeting them each quarter and will ensure timely postings over the next license term.
