

Online Public Inspection File Exhibit
Dos Costas Communications Corporation

As the result of an administrative oversight, certain documents required by 47 C.F.R. Section 73.3526 were not uploaded to the station's online public file when required. Despite the licensee's best efforts to upload all of the documents to the online public file prior to this filing, uploading was not possible because the FCC's online public file system has not been functional in the days prior to this filing. As soon as the FCC's online public file system is restored, the licensee will upload the documents. The licensee will also amend this application with an updated exhibit at that time.
