Request for Further Extension of STA**

New Hampshire Public Broadcasting (New Hampshire PBS) seeks an extension of the grant of special temporary authority (STA) in LMS File No. 0000063744 (as extended in LMS File Nos. 0000074715, 0000093720, 0000118588, 0000130482, and 0000153329) for this displaced translator station to operate on its displacement Construction Permit (Displacement CP) Channel 36 at reduced power of 228 watts ERP while New Hampshire PBS continues to move forward with its build-out of the full Displacement CP facilities (*see* LMS File No. 0000067834). Grant of an additional extension would serve the public interest by allowing New Hampshire PBS to continue to provide public service through the translator while New Hampshire PBS moves forward with its plans to increase power and improve public service.

The Displacement CP is currently set to expire on November 5, 2021, but New Hampshire PBS is concurrently filing a request for waiver of the tolling rule and a six-month extension of the Displacement CP. Accordingly, New Hampshire PBS hereby requests that this STA also be extended for six months.
