

### **Special Operating Conditions or Restrictions**

The Special Operating Conditions or Restrictions set forth in the underlying construction permit have been fully met. Specifically:

1. The applicant has installed the specified four (4) section, 0.5 wavelength spaced antenna. Accordingly, no further RF field showing is necessary.
2. Warning signs which describe the radiofrequency electromagnetic field radiation hazard are posted on the roof and at appropriate intervals around the house. Access to the roof and tower is restricted to prevent the exposure of humans to RF emissions in excess of the FCC guidelines (OET Bulletin 65, Edition 97-01, released August 1997). Photographs of the RF warning signs and the gate that restricts access to the property, together with other photographs demonstrating the remoteness of the property, are attached hereto.
