

## **Engineering Special Temporary Authority Request**

DTV America Corporation, (“Licensee”) respectfully requests an Engineering Special Temporary Authority (STA) pursuant to the technical specifications listed in the application while it repairs its broadcast facility for this Low power television station (“Station”).

Two of the three transmitter amplifiers were damaged and have been sent to the manufacturer for repair. Currently, the station is able to emit 9.3kW. Once the repaired amplifiers are returned to the local engineer, the station will be able to resume licensed operations.

Grant of Licensee’s Engineering STA promotes the public interest as it will allow KWPL-LP to continue to provide free over-the-air programming to the community and the surrounding area.
