W42DG-D / W26EQ-D State College, PA - Facility ID: 168229
LPTV Engineering STA Application - BLDTL-20071109AAR

W26EQ-D was recently granted a Construction Permit (File No. BLANK-0000143002) for a displacement facility on channel 26 to serve State College, PA. Circumstances beyond the control of the permittee have prevented final installation of the antenna authorized in Construction Permit File No. BLANK-0000143002. Special temporary authority is requested to operate on channel 26 from the CP site with a directional antenna the applicant has on hand, at reduced power.

An exhibit is included that shows the proposed STA coverage is wholly within the authorized CP coverage area, and that the community of license State College, PA will be served. The requested STA is in the public interest as it will bring programming to State College it would otherwise not have.

Once the CP antenna is installed the STA will no longer be required.
