

Request for 73.509 Waiver (for received interference) Regarding KGKV

Applicant respectfully requests a waiver of 73.509 of the Commission's rules to allow KKER to **receive interference to approximately 0.02% of the population** within the KGKV predicted interfering contour (100 dBu F(50,10)) which would occur within the predicted protected (60 dBu F(50,50)) contour of KKER's proposed facility.

KKER's existing 60 dBu service area contains 128,569 persons (2010 Census) and covers 7,574.9 km².

KKER's proposed 60 dBu service area would contain 166,354 persons (2010 Census) and cover 10,057.5 km². The population served by KKER's 60 dBu service contour would increase by 37,785 persons (29.4% more than the current population served).

KKER would receive interference from KGKV's 100 dBu interfering contour over 17.9 km² and containing only 32 persons currently outside of the existing KKER service contour (SEE FIGURE 3). This would be 0.02% of the total KKER population served.

Therefore, a waiver of section 73.509 overlap requirements with respect to third adjacent station KGKV regarding proposed overlap is requested in conjunction with this application.
