

## **"Extraordinary circumstances"**

WDMI, Channel 31, Minneapolis, MN, is displaced by KARE a full power who moved to channel 31 in same market since they found channel 11 coverage "unacceptable".

KARE has requested WDMI cease operation on channel 31 so KARE can begin operation on channel 31 as soon as possible.

We have found channel 26 will work with the same channel 31 antenna at 1 KW ERP. We therefore request Special Temporary Authority to operate based on the attached STA till we can file for a new directional pattern on channel 26 and install a new antenna.

This will serve the public by allowing WDMI to stay on the air and we expect the duration to be short as we will order the new antenna as soon as the permanent construction permit is granted.
