

## **Engineering Special Temporary Authority Request**

DTV America Corporation, (“Licensee”) respectfully requests an Engineering Special Temporary Authority (STA) pursuant to the technical specifications listed in the application while it repairs its broadcast facility for this Low power television station (“Station”).

The Station’s transmitter is unbalanced which has reduced the ERP to 1.64kW. The Licensee is working diligently with the transmitter vendor to receive a replacement power amplifier. Once received, the new amplifier will be installed, and the station will be able to resume licensed operations.

Grant of Licensee’s Engineering STA promotes the public interest as it will allow WCQA-LD to continue to provide free over-the-air programming to the community and the surrounding area.
