

### **NARRATIVE REGARDING SILENT STA**

The licensee is working with equipment suppliers seeking to upgrade/replace the current antenna system for WFBI-LD. In order to facilitate the tower preparations; construction personnel retention and coordination; and, the upgrade generally, the Licensee has determined that the station needs to go silent during this period. Aside from potential winter weather issues, supply chain issues affecting the broadcast industry may impact the proposed construction deadline for this project but the licensee is cautiously optimistic that the upgrade can be completed by March 15, 2022.
