

Special Temporary Authority Statement

***CBS Broadcasting Inc.***

WCCO-TV Minneapolis, Minnesota

Facility ID 9629

Ch. 32 750 kW 455.9 m

CBS Broadcasting Inc. (“ViacomCBS”) hereby seeks approval to operate station WCCO-TV Minneapolis, MN with temporary facilities at reduced power for a period not expected to exceed 60 days. Temporary operation is necessary during construction of the WCCO-TV main antenna to accommodate a series of facility changes by other DTV stations at the multi-use tower facility in Shoreview, MN.

The temporary facility will operate with an antenna height 455.9 meters above average terrain (HAAT) and an effective radiated power (ERP) of 750 kW. As shown in **Figure 1**, the temporary service contour will maintain coverage as nearly as possible to that of the licensed main antenna without exceeding it and the principal community contour will continue to encompass Minneapolis.

Human Exposure to radiofrequency exposure from the proposed antenna was evaluated in the antenna Construction Permit application and found to be less than the FCC’s limit.<sup>1</sup> RF exposure signs will continue to be posted and ViacomCBS will continue following procedures necessary to prevent field exposure exceeding the FCC’s guidelines.
