

Application for Minor Change
Station KCHH (FM) Worden MT
FCC Facility ID 1315

TECHNICAL EXHIBIT

This technical exhibit is prepared on behalf of Townsquare License, LLC Licensee of Station KCHH (FM) Worden MT. This instant proposal is a one-step reduction in class from C0 to C1 for the community as a minor change application.

The proposed facility will combine with the current licensed antenna for co-owned station KCTR-FM on ASR 1002037 owned by the applicant. No technical changes are being proposed to KCTR-FM, but an updated license application will be filed after the installation of the combiner which will alter the Transmitter Power Output of that station.

Allotment Point:

This minor change proposes to place the allotment point for the station at the proposed construction location. The entire community of license is encompassed within 34km of the proposed location, well within the 50km requirement. The proposed 70dbu contour fully encompasses the current city of license.

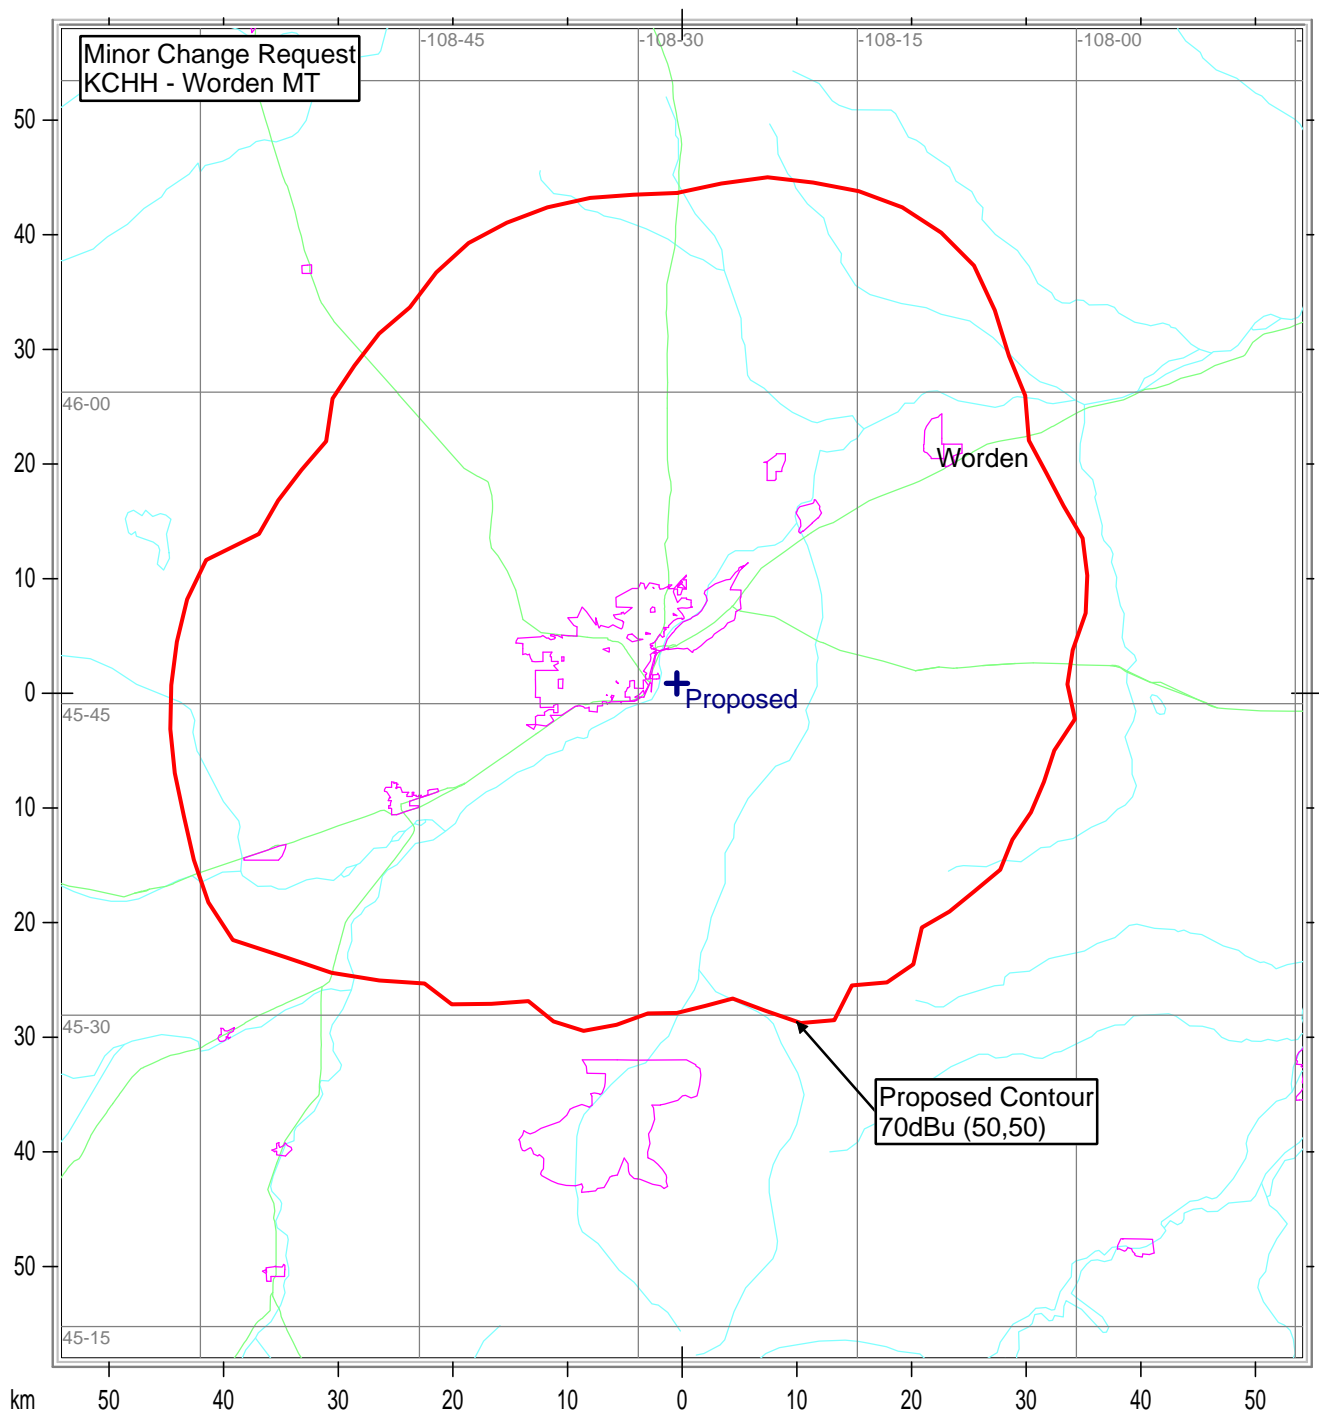

Interference:

The proposed facility meets all of the separation requirements in the allocation picture in compliance with section 73.207 for a Class C1 facility operating on the noted channel and Effective Radiated Power.

Respectfully,

A handwritten signature in black ink that reads 'Jim Turvaille'. The signature is stylized with a large, looping 'J' and a cursive 'Turvaille'.
