

**EXPLANATORY EXHIBIT**  
**LICENSE RENEWAL APPLICATION OF WBOQ**

WBOQ (the “Station”) maintains an online public inspection file (“OPIF”) pursuant to Section 73.3527 of the FCC’s rules. During the course of preparing the instant license renewal application, the Station determined that the following three documents were filed later than specified in the applicable FCC rule due to an internal oversight.

<b>Document</b>	<b>Upload Deadline</b>	<b>Date Uploaded</b>
EEO Report (2017-2018)	12/1/2018	1/28/2019
EEO Report (2018-2019)	12/1/2019	3/31/2021
EEO Report (2019-2020)	12/1/2020	3/31/2021

Additionally, the following two Issues and Programs Lists were timely filed but later updated after their respective deadlines had passed. As a result, the “upload” date listed in the OPIF for both of these items reflects the later date on which the documents were updated, and not the date on which the documents were initially uploaded. Accordingly, both documents incorrectly appear as if they were uploaded late, despite having been timely filed.

<b>Document</b>	<b>Upload Deadline</b>	<b>Date Uploaded</b>	<b>Date Updated</b>
Issues and Programs List – Q1 2019	4/10/2019	4/10/2019	4/24/2019
Issues and Programs List – Q1 2020	4/10/2020	4/9/2020	7/7/2020

Finally, as the Commission is aware, commercial radio stations in the top 50 Nielsen Audio radio markets with five or more full-time employees were required to complete the transition to the online database by December 24, 2016; all other stations were given a deadline of March 1, 2018.<sup>1</sup> Although the Station appears to have met the criteria for the earlier deadline, Station personnel were confused about which deadline applied. As a result, the staff responsible for maintaining the Station’s OPIF concluded that the Station was bound by the March 1, 2018 deadline, and did not upload the following documents until after the December 24, 2016 deadline had passed.

WBOQ acknowledges the importance of maintaining a complete and organized OPIF. To this end, the Station plans to coordinate closely with its FCC counsel going forward to ensure that all OPIF upload deadlines are met, and to resolve any confusion regarding which deadlines apply in the future.
