License to Cover Amendment Exhibit**

W293DP License to Cover Amendment Exhibit

Out of an abundance of caution, Calvary Evangelistic Mission (“Permittee”), the permittee of W293DP, submits this exhibit regarding two of its responses contained in its License to Cover Application for W293DP (File Number 0000170559).

First, Permittee inadvertently incorrectly indicated in its Application for License to Cover that it is not exempt from FCC regulatory fees. However, LMS would not allow Permittee to revise its response to this question in its Amendment to the License to Cover, necessitating this exhibit. Permittee is exempt from FCC regulatory fees.

Second, Permittee correctly indicated in its Application for License to Cover that FCC grant of Authorization for this location would not have a significant environmental effect. However, the as-filed reference copy of the application displays the opposite answer to this question. LMS would not accept Permittee’s attempts to revise the response to this question in its Amendment to the License to Cover, necessitating this exhibit. Grant of Authorization would not have a significant environmental effect.
