

Exhibit
Adherence to Minimum Operating Schedule
WIMN-CD, ARECIBO, PR

On September 2017, Hurricanes Irma and Maria passed through Puerto Rico and US Virgin Islands. These Hurricanes caused catastrophic losses on cellular, radio and television communications and significant damage to the island basic infrastructure. The electric system all over the island was devastated. The president of the United States declared Puerto Rico a major disaster area. That determination moved FCC to create a special task force to work with Puerto Rico and US Virgin Islands.

WIMN-CD transmission facilities; antenna structure, master control, microwave, transmission lines were destroyed. Since the infrastructure of the island was severe damaged the possibilities of acquire materials for the reconstruction were minimal. A Silent Authority was filed on October 31, 2017 and September 14, 2018.

WIMN-CD (Facility ID 2245) was off air from September 20, 2017 to January 23, 2019. WIMN-CD filed a Resumption of Operations of a Digital Class A Station application on January 25, 2019.
