Morning Mark,

I hope all is well.

On 6/30/21 I filed an STA seeking permission to continue operations at reduced power.

Station is KFLA-LD FCC ID# 28566

The File number of STA is 0000151295.

It was granted 7/20/21.

I recently installed a new GatesAir transmitter and the station is operating at full power once again.

I logged in to LMS today to notify the FCC of this but I was not able to find a form to complete to notify the FCC that the station has resumed normal operations.

How do I notify the FCC that the station has returned to full power operations?

Thanks,

Roy Mayhugh
