

## DESCRIPTION OF AMENDMENT

The following changes were made to the referenced application.

- Technical Certifications:

This amendment to the pending application for a new NCE FM at Laramie, Wyoming filed by Cedar Cove Broadcasting, Inc. (“CCB”) is being made after a staff inquiry regarding potential prohibitive overlap with KUWY(FM) Laramie, WY. Discrepancies in the different terrain databases have caused the potential issue, so in abundance of caution, CCB has lowered the proposed Effective Radiated Power to provide adequate contour protection towards KUWY(FM) utilizing a more accurate 30 second Globe Terrain database. The Technical Statement and exhibits have been updated to reflect these technical changes.
