

Purpose of Amendment

The licensee of station KKTF-LD (FIN 168229), Chico, California, hereby amends its pending Displacement Application filed on December 30, 2021 (*See* LMS File No. 0000178259), to change the station's requested displacement channel and to update the technical parameters accordingly. The licensee has been coordinating with FCC staff, and, according to Staff analysis, the proposed operation on Channel 17 would apparently cause impermissible predicted interference to land mobile operations. Consequently, the licensee is hereby amending the Displacement Application requesting Channel 24 instead of Channel 17 in order to avoid any such concerns.
