

FCC Amendment #2 filed 11/29/2021

89,7 Mhz Culbertson, NE Theatre Organ Preservation of Nebraska.

Amendment made to reflect HAAT of 114 meters. In error on the original application form 340 the question of **Height of Radiation Center Above Average Terrain**: was inadvertently filled in with 925.9 when the correct number is 114.

This change has been made in this amendment. The FCC application is not changed in any way. This mistake was a clerical error. The Form 340 now matches the technical exhibits.
