

SPECIAL OPERATING CONDITIONS STATEMENT  
WOTH(FM) WILLIAMSPORT, PA  
LICENSE APPLICATION  
BACKYARD BROADCASTING OF PENNSYLVANIA, LLC  
JANUARY 2022

This Special Operating Conditions statement is being filed with a license application for WOTH(FM) Williamsport, Pennsylvania, facility ID 3633. This license application covers the outstanding Construction Permit (“CP”) number 0000143653.

The CP contains two Special Operating Conditions. The first is that WOTH(FM) must cease the use of its currently licensed Auxiliary licensed facility, BXMLH-20130605AAO due to a violation of Section 73.1675(a)(1). Alternately, the licensee may seek modification of the auxiliary facility in accordance with Section 73.1675(c)(1) to bring it in compliance. The Licensee, Backyard Broadcasting of Pennsylvania, LLC, has concurrently filed an application to modify its Auxiliary license for WOTH (BXMLH-20130605AAO) to bring it into compliance with Section 73.1675(a)(1). Until this application is acted upon, WOTH will not conduct any operation of Auxiliary license BXMLH-20130605AAO.

The second Special Operating Condition calls for Spurious Emissions Measurements to be made under 47 C.F.R. Section 73.317(b) through 73.317(d). This condition is likely added by the Commission because there is also an outstanding CP for Co-Owned WZXR(FM) South Williamsport, PA, facility ID 61180, file number 0000143645 to relocate to this same tower site. However, WZXR has not yet relocated to this site, hence there is only WOTH(FM) operating at this tower site. Thus, this Spurious Emission Measurement requirement should not be required. If and when WZXR relocates to this same site, measurements will be conducted at that time.
