

**Facility Type**  
**K248DD Portland, OR**

The correct Facility Type, under Channel and Facility Information, should be “Commercial”. The construction permit authorized K248DD to rebroadcast primary station KBMS(AM), which is a commercial station. The translator previously rebroadcast non-commercial KLVP-FM, so LMS pre-fills this field with “Noncommercial Educational”

At this time, the LMS system does not automatically change the Facility Type when a different type of primary station is entered, and a manual correction (by the applicant) to this field is not allowed within LMS.
