Online Public Inspection File

Albright College, licensee of noncommercial educational radio station WXAC(FM), Reading, Pennsylvania, reports the following with regard to the placement of certain items into the station's online public inspection file. The WXAC public file is now complete with all required items, and all of the station's quarterly issues and programs lists were timely added to the online (or paper) public file when originally due, but the 2014 (3rd/4th quarter) and 2015 lists were not transferred to the online file during the 2018 transition period for the launch of the online file site. However, WXAC has now added each of these items to the station's online public file such that it is complete with all required items.
