

**Statement of Educational Objectives**  
**Vanguard Association of Sunbelt Colleges Corporation**

The Vanguard Association of Sunbelt Colleges Corporation is organized to promote innovative Christian education. We pursue this goal using a variety of means; including, but not limited to, the following:

- Publishing and broadcasting educational material from a Christian perspective, for the general public and for educational researchers, especially emphasizing the relationship between Christian education and Christian faith, and focusing on the importance of the following features (among others) in post-secondary education:
  - The importance and benefits of learning a manual trade, whether or not professional or “white collar” education is also obtained
  - The benefits of a peaceful, rural educational environment
  - The connection between good health, education, and Christian faith
  - Health education and health promotional material
  - The importance of analytical reasoning, rather than merely accepting what others have said on a subject
  - The Christian Scriptures as the foundation for post-secondary education
  - The value of broadcasting and mass media in education and in the community
- Providing consulting to like-minded Christian post-secondary educational institutions regarding the accreditation process and related activities
- Developing innovative accreditation standards, preparatory to operating an innovative Christian post-secondary accrediting agency

In support of these objectives, we are applying for this FM broadcast license, in order to transmit educational programs to promote these objectives in the community.
