

**FCC Form 303-S
E/I Symbol Certification**

During a portion of the past license term, the Station aired programming from the LAFF TV network on a multicast stream, which included educational and information children's television programming. On or about October 25, 2016, LAFF TV notified KNIC-DT that, due to a technical error that occurred at the network level, all core children's programs aired from October 1, 2016, to October 15, 2016, without the requisite E/I symbol. The station noted this in its amended 3rd Quarter and its 4th Quarter children's programming reports. LAFF TV informed the Station that it has established new processes to ensure the technical issue did not recur during subsequent quarters. Additionally, the affected programs were re-broadcast with the E/I symbol during the same quarter.
