Digital Low Power Television Station Application for Minor Modification of Licensed Facility

prepared for

Gray Television Licensee, LLC
WSHM-LD Springfield, MA
Facility ID 67980
Ch. 20 4.9 kW Directional

Gray Television Licensee, LLC (“*Gray*”) is the licensee of digital Low Power Television station WSHM-LD, Channel 20, Facility ID 67980, Springfield MA. WSHM-LD is licensed to operate at 6 kW effective radiated power (“ERP”) with a directional antenna (file# 0000080531). *Gray* herein seeks a minor modification Construction Permit to relocate WSHM-LD and to utilize a different directional antenna pattern at increased antenna height and reduced ERP.

The proposed facility will employ an existing broadband antenna that is side-mounted on the tower structure associated with FCC Antenna Structure Registration number 1018460, located 23.9 km (14.8 miles) from the licensed site. No change to the overall structure height is proposed. The antenna supporting structure is utilized by *Gray*’s full-service television station WGGB-TV (Facility ID 25682, Springfield MA). The broadband antenna was previously utilized by WGGB-TV as an interim antenna in 2019 during WGGB-TV’s transition to its reassignment channel (file# 0000078098).

The broadband antenna is a Dielectric model TFU-8WB-1-R C160 having horizontal polarization. The proposed ERP is 4.9 kW using a “full service” out of channel emission mask. A plot of the directional antenna’s azimuthal pattern on Channel 14 is supplied in Figure 1. Figure 2 depicts the coverage contour of the proposed facility as well as that of the licensed facility, demonstrating compliance with §73.3572 for a minor change.

Interference study per OET Bulletin 69¹ shows that the proposal complies with the FCC's interference protection requirements toward all digital television, television translator, LPTV, and Class A stations. FCC processing of this proposal is requested using a 0.5 km cell size and 0.1 km terrain profile increment. The results, summarized in Table 1, show that any new interference does not exceed the FCC's interference limits (0.5 percent to full power and Class A stations, and 2.0 percent to secondary stations) to any facility.

Human Exposure to Radiofrequency Electromagnetic Field (Environmental)

The proposed facility was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10) and 10 percent antenna relative field in downward elevations (pattern data shows 10 percent or less relative field at angles 25 to 90 degrees below the antenna), the calculated power density attributable to the proposed facility at locations near the transmitter site at a height of two meters above ground level is $1.4 \mu\text{W}/\text{cm}^2$, which is 0.4 percent of the general population / uncontrolled maximum permissible exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

¹FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 ("OET-69"). This analysis employed the FCC's current "TVStudy" software with the default application processing template settings, 0.5 km cell size, and 0.1 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of TVStudy show excellent correlation.

Channel and Facility Information

Section	Question	Response
Facility ID	67980	
State	Massachusetts	
City	SPRINGFIELD	
LPD Channel	20	

Primary station proposed to be rebroadcast:

Facility Id	Call Sign	City	State

Antenna Location Data	Section	Question	Response
Antenna Structure Registration	Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?	Yes
		ASR Number	1018460
Coordinates (NAD83)	Latitude	42° 14' 30.0" N+	
	Longitude	072° 38' 55.0" W-	
	Structure Type	TOWER-A free standing or guyed struct	
	Overall Structure Height	59.6 meters	
	Support Structure Height	45.7 meters	
	Ground Elevation (AMSL)	365.8 meters	
Antenna Data	Height of Radiation Center Above Ground Level	36.6 meters	
	Height of Radiation Center Above Mean Sea Level	402.4 meters	
	Effective Radiated Power	4.9 kW	

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	No
		Antenna ID	
	Antenna Manufacturer and Model	Manufacturer:	Dielectric
		Model	TFU-8WB-1-R C160
		Rotation	180 degrees
		Electrical Beam Tilt	1.05
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
		Polarization	Horizontal
	Elevation Radiation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	
		Out-of-Channel Emission Mask:	Full Service
