## **ENGINEERING REPORT**

---

The licensed site (N 35-12-53.7; W 106-27-03.8) is moved less than 2 seconds in latitude and longitude from that of the FS CP so that the Nicom BKG-77 single-bay FM antenna is being side-mounted on the support tower of KIOT(FM) (fac id 73117). (This is instead of mounting on a nearby pole.) The only significant change to the CP will be to the overall height of the support structure, a change to 48.8 meters AGL. Section 73.1690 appears to allow these changes on the license to cover filing. Specifically, Section 73.1690(c)(11) allows the proposed coordinate correction.
