Re: Informal request for Special Temporary Authority

Call: WCKR-FM, Hornell, NY

FACID: 52842

To whom it may concern,

PMJ Communications Inc. the licensee of WCKR-FM, Hornell, NY reports that the FM broadcast antenna for the station has sustained damage. As a result the maximum power the station can operate at is limited to 1.6kW. This represents a considerable reduction from the licensed power of 2.55 kW. At this writing material and labor are being procured to affect the necessary repairs. Under present conditions it is estimated that the repairs may take up to 4 to 5 months to complete. Accordingly, the licensee PMJ Communications Inc. is respectfully requesting Special Temporary Authority to operate with parameters at variance for a period of 180 days.

Sincerely,

Richard C. Pogson
Technical Consultant
