

JUSTIFICATION FOR SILENT STA

Digital LPTV station K25MK-D (Facility ID 69921) temporarily suspended operations on May 10, 2022 because it has become necessary to move the station to a different antenna located on another structure at the same communications site. A formal construction permit (CP) application is required for these technical changes in accordance with 47 CFR § 74.751(b) and, therefore, the licensee is seeking temporary relief during the interim period needed to obtain a CP grant and implement the relocation to the new antenna. The licensee plans to restore over the air service to the public as soon as possible, but the exact date that the replacement antenna will be available for K25MK-D hasn't been determined yet.
