We are small, family owned businesses that only operates in Rapid City, South Dakota. We are working towards completing this project this year. Challenges with the current economic conditions due to COVID and supply issues as well as the vendors necessary to complete the project have continued. We need construction related contractors such as HVAC and electricians to complete this. The housing market has been booming here and it is a challenge to find contractors that have time to bid and work on our project and do it for budget that is in line with what is expected and we can afford. We currently have two contractors we think will be able to complete the project in the coming months. We are also still understaffed but working on hiring additional staff. This will help us to be able to focus more attention on this project.

Sincerely,

Christian Haugo
