

**STATEMENT OF WILLIAM J. GETZ  
IN SUPPORT OF AN APPLICATION  
FOR CONSENT TO ASSIGNMENT  
OF BROADCAST LICENSE**

I am a Radio Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission. This office has been authorized by the Applicant to prepare this statement and the associated exhibits in support of the common ownership of the following full-service radio stations:

- WATR(AM), Waterbury, CT (Facility ID 71102)
- WWCO(AM), Waterbury, CT (Facility ID 40678)
- WRYM(AM), New Britain, CT (Facility ID 26314)

Both WATR(AM) and WWCO(AM) are licensed to Waterbury, CT, a community located outside of a Nielsen Radio Metro Area. Radio station WRYM(AM) is licensed to a community located within the nearby Hartford-New Britain-Middletown Nielsen Radio Metro Area. Exhibit A depicts the principal community contours of the subject stations. The applicant currently holds no attributable interest in any other nearby stations.

As shown in Exhibit A, the principal community contours of the Waterbury stations do not overlap the WRYM(AM) principal community contour. Accordingly, this material demonstrates that the common ownership of the stations listed above is compliant with Section 73.3555 of the FCC Rules as it applies to the contour-defined radio market.

Multiple Ownership Contour-Defined Market Analysis

Exhibit B depicts the two-station radio market as defined by the total principal community contour area of WATR(AM) and WWCO(AM) and the principal community contours for the other stations, in which the Applicant holds no attributable interest, which are counted in the contour-defined radio market. Table 1 contains each station's call sign, city of license, state, channel of operation, and technical facilities.

As stated above, the applicant will own or control 0 FM stations and 2 AM stations in the contour-defined radio market. Pursuant to Section 73.3555(a)(1)(iv) of the FCC Rules, the applicant is permitted to own two radio stations (both in the same service) provided the market contains at least two other stations in which the applicant holds no cognizable interest (the applicant cannot have cognizable interest in more than 50% of the market stations). As shown in Exhibit B, the contour-defined radio market contains at least 14 operating commercial or noncommercial radio stations [defined by the city-grade contours of the 2 subject stations and the overlapping city-grade contours of at least 12 other stations in which the applicant holds no attributable interest]. Accordingly, the proposed station acquisitions result in a combination of stations which satisfies the multiple ownership criteria set forth in Section 73.3555 of the FCC Rules.

This statement and the supporting Exhibits and Table were prepared by me or under my direct supervision and are believed to be true and correct.

DATED: May 10, 2022
