

**Application for amendment of construction permit application**

**FCC file number 0000191300**

**FCC facility ID 768099**

**The purpose of this amendment is to change the ERP of the requested facility from 30 watts to 5 watts. This will ensure that the predicted 60 dbu contour of the proposed auxiliary facility will not extend the 60 dbu contour of the licensed facility. A map showing both the licensed 60 dbu contour and the proposed new (5-watt ERP) 60 dbu contour are shown below. The contours are in green.**

**Even with reduced ERP, the auxiliary facility will still cover virtually all of the city limits of Lamar, Colorado with a 60 dbu signal.**
