

FCC Form 303-S
Public Inspection File

KTFK-DT, Stockton, CA (the "Station") timely prepared the 4Q 2019 Children's Commercial Limits Certificate but discovered it was missing from the FCC Online Public Inspection File while preparing for the license renewal. The certification was uploaded immediately on July 18, 2022.

The Station believes that it has generally met the requirement in Section 73.1943(c) of the FCC rules to post political orders to the online public inspection file "immediately, absent unusual circumstances." The Station is not aware of any political spot for which it did not post information to the public inspection file. In an abundance of caution, the Station reports the following:

- In July 2020, the Station received orders well in advance of the flight dates for three candidate buys for Josh Harder for Congress. The information for the buys was uploaded in August, well before the start of the flights in October.
- Also in July 2020, the Station received the NAB forms for two issue ads. One was uploaded in August, and the other in September before the start of the flight dates.
- In August 2020, the station received information for three issue ads, which were posted 4, 7, and 32 days later but before the start of the flight dates.
