

### **K24FH-D Request for Further Extension of Technical STA**

As the Commission is aware, on or about January 13, 2020, K24FH-D, Glide, Etc., OR (Facility ID No. 50585) was forced off the air because the station's tower fell as a result of ice accumulation. K24FH-D is currently operating at reduced power with a single Kathrein broadband UHF panel at 5 meters above ground level, with 20 watts ERP pursuant to Special Temporary Authority granted in LMS File No. 0000105685, as extended by LMS File Nos. 0000120540, 0000133841, 0000153847, and 0000184883 (the "STA").

Equipment needed for the installation is expected to be delivered near the end of August or in the first part of September. Additionally, although a replacement of the station's permanent tower has now been completed, the licensee of K24FH-D and the permanent tower owner are still in negotiations working toward execution of a tower lease agreement, which is expected shortly.
