

DESCRIPTION OF SILENT STATUS

Edge Spectrum, Inc. ("ESI"), the licensee of digital low power television station K25KY-D, Fresno, CA (FID 14300) (the "Station"), hereby requests authority to remain silent for good cause shown.

On October 22, 2021, ESI filed a license to cover application for the Station's channel 25 facilities. The Commission granted the license on December 1, 2022, and the Station has been operating continuously since. However, on or around April 7, 2022, American Tower informed ESI that the landowner did not consent to the Station's continued operations at the site. Accordingly, ESI had to immediately discontinue operations, and ESI is currently evaluating options for a new tower site. ESI expects to resume operations as soon as possible and within the six month period of the STA.

To the extent necessary, ESI requests a waiver pursuant to Section 1.3 of the Commission's Rules of the license condition that "[g]rant of this license application is conditioned on continuous operations of the licensed facility for the twelve-month period following grant." Here, the position of the landowner was not foreseeable and is not within ESI's control. ESI is working diligently to restore service from another site.
