

Call letters: KMOR (FM) .C
City of License: Gering, NE
Channel: CH227C0 (93.3 MHz)
File No: LMS-0000100422
Facility ID: 67473
Applicant: Nebraska Rural Radio Association

Explanation of FM License to Cover Filing and Compliance with Special Operating Conditions or Restrictions

1. The applicant certifies coordination with other users of the site to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
2. The applicant certifies that before program tests commence, sufficient measurements have been made establishing that the operation authorized in this construction permit is in compliance with the spurious emissions requirements of 47 C.F.R. Sections 73.317(b) through 73.317(d). All measurements have been made with all stations simultaneously utilizing the shared antenna. These measurements have been submitted to the Commission along with this FCC Application for License. (*see attached Spurious Emissions Study*)
3. The applicant acknowledges although it previously specified use of an ERI Model SHPX-10AC6-SP (EPA Type 3 - Opposed U dipole), 10 section transmitting antenna with full wavelength bay spacing to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines, a different antenna has been employed herein. In this instance, a new twenty (20) bay, Jampro Model JCPB-20HR-.5RFR, half-wave spaced antenna has been installed. Therefore, as another type or size of antenna has been used with this facility, the automatic program test provisions of 47 C.F.R. Section 73.1620 do not apply. In this case, a formal request for Program Test Authority has been filed in conjunction with this FCC License to Cover Application; with updated RF compliance showings also included herein. (*see attached RF Compliance Study*)
