City of License: Scottsbluff, NE
Channel: CH231C1 (94.1 MHz)
File No: LMS-0000150145
Facility ID: 51462
Applicant: Nebraska Rural Radio Association

Explanation of FM License to Cover Filing and Compliance with Special Operating Conditions or Restrictions

1. The applicant certifies coordination with other users of the site to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
2. The applicant acknowledges it previously specified use of a Jampro Model JCPB-20HR-.5RFR (EPA Type 2 - Opposed V dipole), 20 section transmitting antenna with half-wave bay spacing to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. As no other type or size of antenna has been used with the facilities authorized herein, the automatic program test provisions of 47 C.F.R. Section 73.1620 continue to apply. In this case, no formal request for Program Test Authority need be filed in conjunction with this FCC License to Cover Application, nor are any further RF field showings required. However, out of an overabundance of caution, the current RF compliance showing has been resubmitted herein. (*see attached RF Compliance Study*)
3. The applicant certifies that before program tests commence, sufficient measurements have been made establishing that the operation authorized in this construction permit is in compliance with the spurious emissions requirements of 47 C.F.R. Sections 73.317(b) through 73.317(d). All measurements have been made with all stations simultaneously utilizing the shared antenna. These measurements have been submitted to the Commission along with this FCC Application for License. (*see attached Spurious Emissions Study*)
