

Reduced Power STA Exhibit

By a notification filed on August 23, 2022 (LMS File No. 0000198169), the licensee of FM radio broadcast station KHMR(FM), Lovelady, Texas (Facility ID No. 164205, “KHMR”), KM Radio of Lovelady, LLC (“KM”), reported that it had an engineer inspect the station on Friday, August 12, 2022, who identified that the transmitter’s exciter needed repair, and removed it to ship the exciter back to its vendor for repair, leaving the station operating at approximately 50% effective radiated power during repairs. While KM originally expected the exciter to be repaired and reinstalled within 10 days, the process has taken longer than anticipated, and therefore this request for special temporary authority (“STA”) is being filed for the reduced power operation to continue beyond 30 days. KM anticipates KHMR will be back to full power as early as tomorrow, Friday, September 16, 2022, but out of an abundance of caution requests that the STA be granted for 30 days, or until Saturday, October 15, 2022.
