

PETITION FOR WAIVER

Radiant Light Broadcasting (“RLB”) hereby respectfully petitions for waiver of Section 73.3598(e) of the Commission’s rules for its failure to file a license to cover application before the expiration date of the digital construction permit (File No. 0000029552) (“Digital Construction Permit”) associated with low power television station KWWO-LD, Walla Walla, Washington (Facility ID No. 54456) (“Station”). Specifically, RLB requests that the Commission: (1) reinstate the Digital Construction Permit; and (2) permit the late filing of the pending application for a license to cover the Digital Construction Permit (File No. 0000196529) (“LTC Application”). For the reasons stated herein, the requested relief is fully warranted.

BACKGROUND

Since 1988, RLB has served as an enduring source of thoughtful and thought-provoking media that educates, informs, and inspires. RLB is a local, independently owned and operated, viewer-supported, faith-based, non-profit organization that provides religious programming on the Station to serve Walla Walla, Washington and the surrounding areas. For many years, the Station operated on Channel 47. However, as a result of the Broadcast Incentive Auction, the Station was forced to transition to Channel 32. On August 29, 2017, RLB filed the application for the Digital Construction Permit. Simultaneously, RLB filed a Request for Special Temporary Authority (“STA Request”), proposing temporary digital operations for the Station because of T-Mobile’s requirement that RLB clear Channel 47 before the Station’s transition date (File No. 0000029553). The STA Request was granted on September 7, 2017, and expired on March 7, 2018. The Digital Construction Permit was subsequently granted on June 6, 2018, and was due to expire on June 6, 2021.

On December 24, 2018 – well in advance of the June 6, 2021 deadline – RLB timely completed construction of the Station’s digital facilities pursuant to its Digital Construction Permit

and commenced broadcasting. However, pursuant to Section 74.788(a) of the Commission's rules, the Station's Digital Construction Permit may have expired on June 6, 2021 because RLB neglected to file the LTC Application before that date. (The LTC Application was filed on August 1, 2022). The Commission's staff has informally advised RLB that the LTC Application could not be granted until the Digital Construction Permit was reinstated.

Evidence of RLB's successful buildout of the Station's Digital Construction Permit during the Summer of 2018 is set forth herein. The installation was performed and/or overseen by Rob Stilson, of RS Technology, and a Declaration executed by Mr. Stilson to that effect is attached hereto (Exhibit A). Also attached, at Exhibit B, are invoices from RS Technology describing the work that was undertaken at that time.¹ Attached as Exhibit C is the Declaration of Eric Pirozok, the General Manager of RLB, who is certifying under penalty of perjury that RLB completed construction pursuant to the Digital Construction Permit as of August 12, 2018. (However, as set forth in Mr. Pirozok's Declaration, the Station did not commence broadcasting until December 24, 2018 because it took until that date for RLB to devise a solution for programming to be delivered to the Station's transmitter site.)

Evidence of RLB's continuous operation of the Station since December 24, 2018 also is included. Such evidence includes: (a) blog entries on RLB's website (rlb.org) regarding the excitement that was felt in the community when the Station resumed broadcasting on channel 32 (Exhibit D); (b) canceled checks, confirming that RLB made payments during 2018-19 to the

¹ Unfortunately, Mr. Stilson did not take any photographs that would serve as sufficient evidence to document the installation. In addition, although the attached invoices reference "KRLB," such invoices make plain that the work being undertaken was for channel 32, which is associated with KWWO, the "Station" that is the subject of this request and license to cover application.

owner of the site on which the Station's tower is located (Exhibit E);² (c) bills to RLB from Umatilla Electric Cooperative, which is the local electric utility servicing the Station (Exhibit F);³ and (d) Affidavits of Performance through the end of 2019 provided by RLB to Trinity Broadcasting Network ("TBN"), the entity that provides programming to the Station (Exhibit G). As indicated in Mr. Pirozok's Declaration, if TBN believed that the Station was not on the air during any period after December 24, 2018 other than as set forth in the Affidavits, TBN would have inquired with RLB; because no such inquiries were made, it is reasonable to assume that TBN accepted the Affidavits as evidence that the Station was on the air during each month covered by the Affidavits.⁴ Based on the foregoing, there is no question that the Station has been on the air on its digital channel (channel 32) continuously since December 24, 2018, with the exception of the very short periods between January 1-23, 2019, July 11-21, 2022, and August 24-31, 2022.

DISCUSSION

RLB requests waiver of Section 73.3598(e) of the Commission's rules to permit: (1) the reinstatement of the Digital Construction Permit; and (2) consideration of the LTC Application;. The Commission may grant a waiver for good cause shown.⁵ A waiver is appropriate where the

² Upon request, RLB can provide the Commission with additional canceled checks, confirming that it has made additional payments to the landlord of the tower site during every month since January 2020 (the last month provided on Exhibit E).

³ Upon request, RLB can provide the Commission with additional utility bills from Umatilla Electric Cooperative during every month since January 2020 (the last month provided on Exhibit F).

⁴ Upon request, RLB can provide the Commission with additional Affidavits of Performance, confirming that the Station was on the air at all times since December 2019 (the last month provided on Exhibit G), with the exception of July 11-21, 2022 and August 24-31, 2022. RLB also can, upon request, provide the Commission with canceled checks, confirming that TBN provided payment to RLB each month that the Station was on the air, pursuant to an Affiliation Agreement that RLB has with TBN. Per Mr. Pirozok's Declaration, if TBN believed there was any issue with the Station's signal, TBN either would have contacted RLB to discuss or perhaps withheld payment to RLB. Because TBN did not raise any concerns, and has not withheld any payments to RLB, it is safe to assume that TBN did not have any concerns.

⁵ See 47 C.F.R. §1.3. Grant of waivers for good cause are within the Commission's delegated authority. See 47 C.F.R. §§0.201 & 0.283.

particular facts make strict compliance inconsistent with the public interest.⁶ In considering a waiver, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.⁷ Such a waiver is appropriate if the specific circumstances warrant a deviation from the general rule, and such deviation will serve the public interest.⁸ Furthermore, longstanding Commission precedent establishes that unintended consequences of a rule are a significant factor warranting waiver.⁹

Section 73.3598(e) of the Commission's rules provides that "[a]ny construction permit for which construction has not been completed and for which an application for license has not been filed, shall be automatically forfeited upon expiration" Automatic forfeiture of a construction permit under Section 73.3598(e) was "adopted for a *singular and narrow purpose*: conservation of Commission staff resources previously devoted to the unnecessary task of cancelling expired permits and so notifying the former permittees."¹⁰ As a result, "[a]utomatic forfeiture of the authorization of an operating station is a severe penalty which the Commission has been reluctant to impose absent an *egregious violation* of its Rules."¹¹ In cases where a permittee timely constructed a station but failed to file the required license application by the station's construction

deadline, the Bureau has determined that reinstatement of that station's construction permit and subsequent grant of its license is appropriate – rather than forfeiture of the permit.¹²

RLB requests similar treatment of the Digital Construction Permit afforded to such other broadcast permittees.¹³ As discussed above, and as confirmed by the evidence included herewith, RLB timely constructed the Station pursuant to the facilities authorized in its Digital Construction Permit, but failed to file the LTC Application before the expiration date. RLB – a small religious broadcaster – had been operating for many years without FCC counsel, and did not realize that it had to file the LTC Application prior to the June 6, 2021 expiration date set forth on the Digital Construction Permit.

As demonstrated by Exhibits A through G set forth herein, RLB completed final construction of the Station's facilities pursuant to the Digital Construction Permit Application facilities as of December 24, 2018, well in advance of the June 6, 2021 expiration date. Further, the Station has operated continuously since December 24, 2018, with the exception of short periods in 2019 and 2022. Accordingly, grant of the instant waiver request is in the public interest because it would permit the Commission to process and approve the LTC Application. Such action would enable RLB to continue providing religious programming to its viewers in Walla Walla, Washington and the surrounding areas.

CONCLUSION

For the foregoing reasons, RLB respectfully requests that the Commission reinstate the Station's Digital Construction Permit and continue its processing of the pending LTC Application.

Declaration of Rob Stilson

DECLARATION OF ROB STILSON

I, Rob Stilson, hereby declare under penalty of perjury as follows:

1. I am the Owner of RS Technology. We were hired by Radiant Light Broadcasting to perform the installation of the digital antenna associated with KWWO-LD, Channel 32.
2. I have personal knowledge of the facts set forth in this foregoing Declaration.
3. During the Summer of 2018, I oversaw the installation of the new antenna, transmitter and related equipment associated with KWWO. Although the invoices I sent to Radiant Light for this work referenced "KRLB," the invoices stated that the work performed was for Channel 32, which is KWWO's channel. On August 12, 2018, I turned the KWWO transmitter on.
4. I believe that all of my work was complete by August 2018.

Executed on the 14th day of September, 2022.

EXHIBIT C
Declaration of Eric Pirozok

DECLARATION OF ERIC PIROZOK

I, Eric Pirozok, hereby declare under penalty of perjury as follows:

1. I am the General Manager of Radiant Light Broadcasting, a not-for-profit entity.
2. I have read the foregoing Request for Waiver ("Request"). I also have personal knowledge of the facts set forth in the Request and the foregoing Declaration. The statements made in the Request are true and correct to the best of my personal knowledge, information and belief.
3. I am responsible for overseeing that all work was completed associated with the KWWO-LD, Channel 32, Walla Walla, Washington "repack" construction permit.
4. In connection with the repack, I contracted with Rob Stilson, of RS Technology, to perform the installation of the new antenna, transmitter and related equipment associated with KWWO. Starting on approximately January 1, 2018, KWWO ceased broadcasting on its old channel until RS Technology could complete its work.
5. Starting in July 2018, RS Technology began the installation of the KWWO digital antenna, transmitter and related equipment. The work was completed on August 12, 2018. However, before KWWO could commence broadcasting, I had to devise a solution to make sure that programming from Trinity Broadcasting Network ("TBN") could be delivered to the KWWO transmitter site.
6. Before the repack, KWWO rebroadcast the KRLB signal, but such an arrangement no longer was technically feasible after the conversion of KWWO to channel 32. During the Fall of 2018, I raised funds to acquire and install a satellite dish and receiver at the KWWO transmitter site so that TBN's programming could be delivered directly to the KWWO transmitter site. On December 24, 2018, KWWO was able to commence broadcasting with TBN's programming.
7. However, there were ongoing issues with the transmission equipment during much of January 2019. By January 24, 2019, those problems were resolved. Thereafter, except for between July 11-21, 2022, and August 24-31, 2022, when KWWO was off the air due to minor mechanical issues, KWWO has been on the air continuously.
8. As indicated on Exhibit E attached to the Request, Radiant Light Broadcasting regularly paid rent to the landlord of the KWWO tower site, Mr. James Hatley, during all of 2018 and 2019.
9. As indicated on Exhibit F attached to the Request, Radiant Light Broadcasting regularly paid the electric bills charged by Umatilla Electric Cooperative during all of 2019.
10. As indicated on Exhibit G attached to the Request, Radiant Light Broadcasting provided Affidavits of Performance to TBN, pursuant to an Affiliation Agreement that Radiant Light has with TBN. In addition, Radiant Light has received regular payments from TBN. If TBN thought that its programming was not being viewed on KWWO, TBN would have either inquired with me as to any problems or perhaps withheld payment. TBN never initiated any such inquiries,

and has not withheld any payments. I believe that Radiant Light has an excellent relationship with TBN.

11. As indicated on Exhibit D attached to the Request, on the Radiant Light website, Radiant Light Broadcasting received testimonials from viewers, starting in late 2018, regarding the excellent programming provided on KWWO.

12. For many years, Radiant Light Broadcasting did not have FCC counsel. As a result, I was not aware of the requirement to file a license to cover application with the FCC once the work on the repack construction permit was completed and in any event before June 6, 2021.

13. Radiant Light was late in filing the pending license to cover application for KWWO, but all of the statements set forth in that application, as filed on August 1, 2022, remain true and correct to the best of my personal knowledge, information and belief. I believe that a grant of the pending license to cover application for KWWO would be in the public interest, as it will provide a license to Radiant Light to continue providing viewers in Walla Walla, Washington and beyond with excellent public affairs and entertainment programming.

Executed on the 14 day of September, 2022.

Viewer Testimony

Posted by Eric Pirozok on Tuesday, 12 March 2019

television viewer testimony

Dear Eric and KRLB supporters.

Thank you for working so hard to restore our free local Christian television station.

KRLB programming is a critical lifeline to my mother who is largely housebound by the challenges of old age. It provides her with a way to participate in and pray for the world around her, and to receive spiritual encouragement and personal growth.

During the times when the station has been shut down, we have seen a dramatic increase in anxiety, confusion, and depression. When she could once again watch her Christian programs we have seen an amazing increase in her sense of purpose, peace and well-being. This also frees us to care for her more effectively and tend to our other responsibilities as well.

KRLB makes possible greater fulfillment in Mom's life and less pressure on ours. If it impacts our family so dramatically....I wonder how many other people are also impacted in critical ways by this very important ministry.

I know that this station is being kept alive mostly by sacrificial volunteer hours (LOTS of them!) and small donations by local Christians. I want to express our deep gratitude to all who have given. You make a big difference in our lives.

Thank you.

We Have a Test Signal Working!

Posted by Amy Pirozok on Friday, 2 November 2018

Check out channel 29.1 - You may need to rescan your tv (click "read more" to watch video on how to rescan your tv). We are so close now as Eric has been able to get a test signal to broadcast! There are still some problems that need to be solved before TBN will be back up, but this is the closest we have been so far. Please continue to pray with us for problems to be solved and provision!

Romans 8:28...And we know that all things work together for good...

Posted by Amy Pirozok on Wednesday, 26 September 2018

...to them that love God, and to them who are the called according to HIS purpose.

Are you disappointed, maybe frustrated, that you do not have your TBN back yet? Here at RLB, we are experiencing some of the same feelings. Be encouraged, though, that God will work all things for His good and His glory, and we need to trust in His provision!

The equipment that you see in the picture to the right has caused all kinds of delays. It is called a power meter and communicates between our new transmitter and antennae on Badger Mt. There has been some disagreement between the engineer and the manufacturer as to who is responsible to calibrate it to work for Channel 29. This all started on August 20th and is finally being addressed as the manufacturer agreed to properly calibrate it to work so we shipped it back to the manufacturer. We are currently waiting to receive the power meter back from the manufacturer. Please pray with us that they will take care of this in a prompt manner!

Please continue praying for RLB financially also. Even though we have raised nearly \$94,000, not all of that is money-in-hand. A good portion of it has been money pledged, and not all of the pledged money has come in at this time. And since we have not yet reached our goal, we are about \$5,000 short for paying required repack and operational expenses.

Please pray with us that God will provide the necessary funds in a timely manner as well as get us back on the air! The longer we are off the air, the more difficult it is financially for RLB.

[Log in](#) to post comments

So Close...

Posted by Amy Pirozok on Wednesday, 5 September 2018

Despite a couple of inconvenient set backs this last month, the engineers have finally fully installed our new antennae on Badger Mt. and have been installing the new transmitter located at the foot of the tower. This has been a long tedious process but it almost complete!

New Channel Update

Posted by Amy Pirozok on Friday, 8 June 2018

For those of you eager to watch your Christian television free over the air, it probably feels like it is taking forever!

Please keep praying as we are still working toward this goal! We have had the engineers putting together the antennae, and we were recently notified that our other equipment is finally packed and ready to ship so we should be receiving it soon! Eric has been working with three separate vendors to coordinate them to all work together to get the new equipment delivered and installed. This has been quite the process! Please pray with us that the new equipment can be installed in a timely manner. The sooner all of this is done, the sooner RLB will be back on the air in the Tri-Cities and then in Walla Walla!

Fundraiser Results

Posted by Amy Pirozok on Friday, 8 June 2018

As many of you know, we held a fundraising banquet on Saturday, May 19th. The goal was to continue to raise funds so that we could get our Walla Walla channel back on the air. We had about 50 people attend to hear Eric share the heart of Radiant Light Broadcasting "to reach the widows in their distress". God blessed these efforts as of to-date, the banquet brought in over \$10,000 in one-time gifts and monthly pledges. We are nearly two-thirds to our total goal!

A huge THANK YOU to all of those who sponsored a table! The cost of this banquet was entirely covered by our sponsors. This allowed us to apply all funds donated and pledged to our efforts to get back on the air (repack). Thank you also to those who attended as we were blessed by your support of Radiant Light Broadcasting and the importance of having Christian broadcast television free to viewers in the Tri-Cities and Walla Walla!

If you would like to help us reach our goal to get back on the air, you can donate safely through our website. Just click on the donate button to the right!

EXHIBIT G
Affidavits of Performance from
Trinity Broadcasting Network

AFFIDAVIT OF PERFORMANCE

Station: KWWO Channel: 32 City of License: Walla Walla

State of: Washington County of: Walla Walla

Pursuant to the Affiliate Air Time Contract with Trinity Broadcasting Network, the above referenced Station hereby warrants programming from Trinity Broadcasting Network, for the month of January, 2019, was broadcast according to the terms of the contract, except as noted below under "Discrepancies". This includes the Network's flagship program, *Praise the Lord*, at its live satellite time, Sunday through Friday, 7 P.M. to 10 P.M. (Pacific Time). If this Affidavit is for a month when TBN held its national telethon during two (2) seven (7) consecutive day periods, Station warrants the telethon was carried in its entirety without interruption, except as required by the Federal Communications Commission.

DISCREPANCIES: (DAYS/HOURS OFF THE AIR)

We are back on the air in Walla Walla!
We were broadcasting January 24-31, 2019,
24/7 in Walla Walla, Channel KWWO 32.
We were on the air 8 days in January.

I declare under penalty of perjury under the laws of the state of Washington.
That the foregoing is true and correct.

Executed on this 1st day of February, 2019
in Richland (City), Washington (State)
