

Exhibit Pursuant to Section 73.3555 of the Commission's Rules

The Applicant and its attributable interest holders certify that they comply with Section 73.3555(a) of the Commission's rules. The attached contour map shows all of the full power station contours held by Applicant and its affiliates. None of Applicant's attributable interest holders have disclosable interests in any stations other than those hold by Applicant and its affiliates. As demonstrated by the attached contour map, neither the Applicant nor its affiliates hold more than five stations or more than three stations of the same service in any market. Therefore, Applicant and its affiliates each comply with Section 73.3555(a) of the Commission's rules. In addition, because Applicant's attributable interest holders do not have any attributable interests outside of Applicant and its affiliates, the attached contour map further demonstrates that Applicant's attributable interest holders comply with Section 73.3555(a) of the Commission's rules.
