

PUBLIC FILE EXHIBIT

Television Station KOHD, Bend, Oregon, Facility ID No. 166534 (the "Station") routinely worked to maintain its online public inspection file throughout this license term. However, certain uploads may have been briefly delayed. For example, the Station was not able to upload its annual EEO report until four days after its October 1 due date on two occasions: once because the Station had technical challenges with uploading the report (which coincided with the launch of the Station's own website), and once because the relevant staffer was unexpectedly subject to COVID-19 quarantine.¹ The Station also was delayed in filing its quarterly issues/program report by a couple of days on three occasions (not including the 2018Q4 report, which was delayed by the government shutdown through late January 2019). In addition, with respect to uploaded information regarding political advertising to the Station's online public inspection file, some materials were not uploaded timely. Promptly upon discovery, the licensee took corrective review to ensure that all political advertising information is uploaded in a timely fashion.

Finally, by way of explanation, and in the interest of completeness, the Station began adding a separate quarterly issues and programs list for its commonly owned low-power TV station, KBNZ-LD, which the Station began multicasting during the last couple of years of its current license term. Accordingly, more recent calendar quarters may include two program reports -- one for the Station on its primary stream, and one for KBNZ-LD as it appeared on the Station's multicast stream.

¹ The Station also may have been delayed from time to time in uploading certain children's commercial limits information; however, as the Station did not air any programs subject to these commercial-limit requirements during this renewal period, any such delays should not be deemed material.
