

### KORK-CD License Renewal Silent STA Exhibit

KORK-CD, FCC Facility ID No. 71079, Portland, OR (the “Station”) was silent once during the license period.

On March 18<sup>th</sup>, 2018, the station filed a silent STA, set to be silent on April 18<sup>th</sup>, 2018, because it had been issued an experimental authorization to transmit in ATSC 3.0 mode. Due to technical issues, the station could only transmit random data and it was wasteful to run the transmitters when no actual testing work could be done. The silent STA was filed at the request of the Video Division Staff.

The silent STA was extended August 14<sup>th</sup>, 2018 because after the Commission dismissed the experimental authorization renewal application for the Station, it authorized six months of silence to return to ATSC 1.0 format.

The station filed a resumption notice on February 2<sup>nd</sup>, 2019.
