

Radio station WFHR and associated translator W248DE were purchased by Civic Media on Oct 3rd, 2022. Upon review of the facilities, we discovered an error in the license for W248DE.

The Antenna Center of radiation is mistakenly listed as being at 125 meters (total structure height) instead of its actual location at 84 meters AGL.

We respectfully request temporary authority to operate with the antenna mounted at 84 meters until arrangements can be made to move the antenna to the 125-meter location specified in our license.

If such arrangements cannot be made, we will file to modify the license accordingly.
