

Request to Extend Silent Special Temporary Authority for K287AD, Facility ID 49542, October 2022

K287AD was displaced on 1/31/2022 by co-channel WRLN coming on the air. The licensee requests an extension of the silent STA initially filed in CDBS in BLSTA-20220211AAF, which expires on 10/25/2022.

The licensee examined other options for a new channel and applied for a displacement channel in LMS File No. 0000194577. A displacement construction permit for K300EA was granted on 7/20/2022. The licensee is working with the tower company and will be ordering and scheduling the tower work when the equipment is due to arrive.

The licensee seeks an extension of the STA until the one-year silent anniversary on 2/1/2023 so that it can complete construction of the facilities authorized in the permit for K300EA.
